

AMID BUILDING SOLUTIONS

Product Brochure

Amid Building Solutions

Amid Building Solutions is a division of Northwood Forest Products International Limited, which was established in 1995.

We pride ourselves in providing a solid and reliable quality product.

We are based in the South West of the UK (we offer delivery to any part of the UK) and manufacture our product in the UK to support our economy and employment.

Our products are unique to our Company – the only place where you can buy an Amid Building Solutions building is from us (with exception of the field shelter and garden shed) and by making bespoke buildings the possibilities are endless.

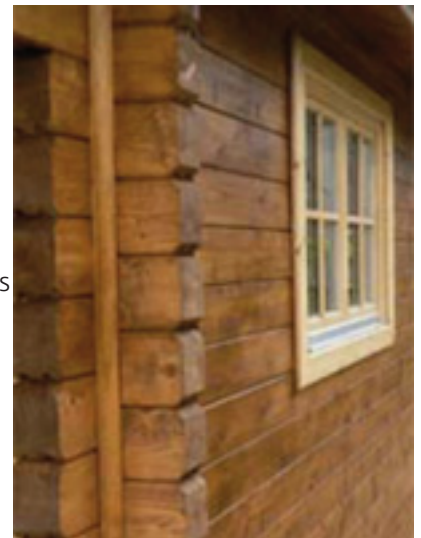

Why Choose Amid Building Solutions?

Essentially maintenance free products

Our high-pressure treated products come complete with a 15-year warranty against rot and fungal decay (conditions apply – see Terms and Conditions). The treatment prevents rot and fungal decay, which can occur on untreated timber buildings. Because we offer a 15-year warranty the cabin is effectively maintenance free (unless you choose to paint the cabin yourself and need to re-do this on a regular basis).

Buildings larger than 3.2 x 2.6m are all made from at least 43mm thick logs, buildings larger than 5.3 x 3.8m will be made from either 70/90/120mm thick logs depending on its overall size. Competitors can offer cheaper buildings but they are generally made from thinner profile timber and are therefore not as stable and solid as our quality buildings.

A thinner log product may be cheaper but it will not last you as long and you may need to replace it in a few years costing you more money.

Bespoke buildings – endless possibilities and options

We started with a small range of buildings suitable for the average size garden and although this has been successful we have listened to feedback from our customers/clients and note the need to offer bespoke buildings. As a result we can now offer a wide range of Bespoke buildings and are very happy to quote to your individual specification.

Our garden cabin range is perfect for extra space, a home office, to house a Jacuzzi, use as a playroom, and for storage amongst many other uses. Many customers want a wooden building to blend in with the landscape and surrounding area rather than a metal shed or concrete building.

The garden shed is perfect for storage and pottering in.

The mobile field shelter can be moved from field to field and does not require a base, it provides shelter for animals and stocks.

Environmentally friendly

Amid Building Solutions are committed to preserving the environment and our timber is sourced from sustainable and well-managed forests. We are FSC (Forest Stewardship Council - our number is SA-COC-1654 - certified in 2000) and PEFC (Programme for the Endorsement of Forest Certification schemes CATG-PEFC-400-C certified in 2003) certified.

We work with one of the world's truly natural and renewable resources. Timber is a Carbon neutral product, even when you take into account energy used for manufacturing and transportation. Trees naturally absorb Carbon Dioxide to produce Oxygen. 1 cubic metre of timber has a carbon output of 33kg. A typical log cabin is between 1-2 cubic metres. For every tonne of CO₂ a tree absorbs, nearly ¾ of a tonne of oxygen is produced (ECCM using Wood Products to Mitigate Climate Change).

Managed forests are the most efficient carbon sponges and producers of oxygen. The ongoing process of harvesting and replanting ensures there is always a percentage of the forest made up of younger trees that absorb more CO₂ than mature trees.

The companies we source our timber from have practically zero wastage, any timber left over after machining a product is converted into wood pellets for heating and cattle bedding or wood chips for paper.

Using wood instead of other building materials saves on average 0.9 tonnes of CO₂ per cubic metre. To give you an idea - a tonne of red brick requires four times the amount of energy to produce than sawn timber. Concrete is five times less carbon efficient and aluminium is 126 times less carbon efficient than timber. (Wood CO₂ts Less - The Facts).

Buckingham 5.3 x 3.8m Garden Room

A little wider than our other garden cabins, this cabin has evolved due to a demand for larger cabins. This cabin is perfect to use as an extra room, a large office for approx 3-4 people, a large home gym, jacuzzi room, kids room or just for extra space.

We offer free delivery on this cabin to the areas shown as green on the map.

If you require delivery to an address outside the green area on the map please contact us for a bespoke quotation.

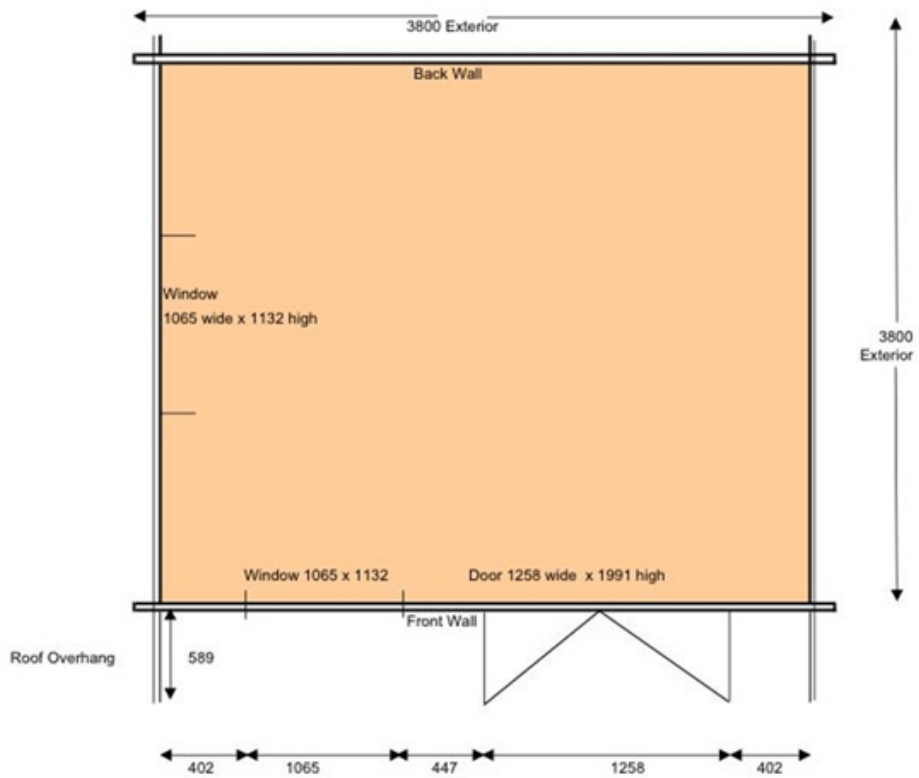

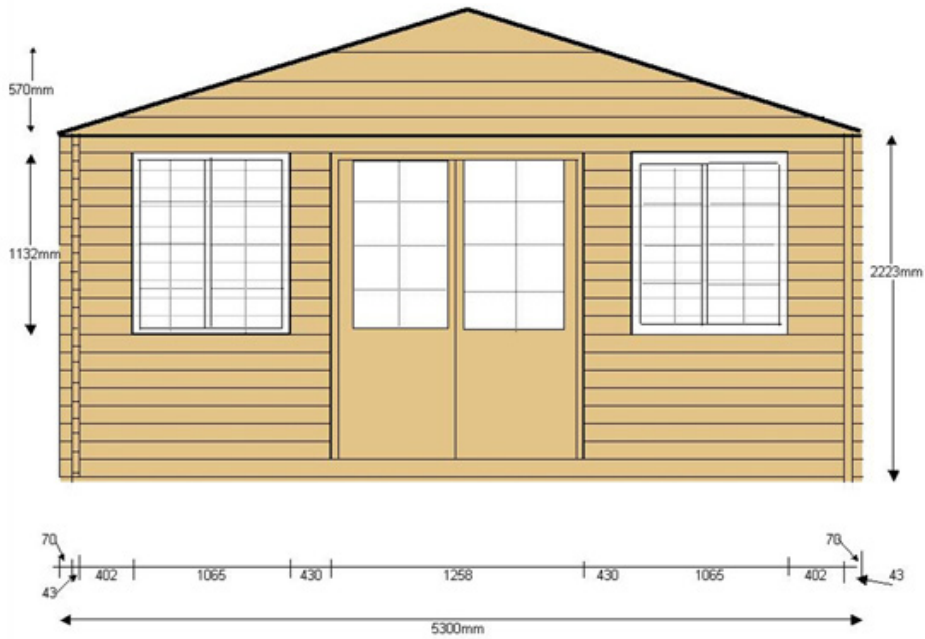

Features

- All parts are high pressure treated
- All doors and windows are double glazed
- One double door and two windows on the front – allowing lots of light into your building
- One side window
- Interchangeable side window – side window can be placed on either side of the cabin
- Windows have chrome latches and casement stays
- Doors come with chrome high security cylindrical lock, chrome door handles and external door stays
- Internal skirting with rebate to hide messy wires
- External sealed corners
- Water repellent clear sealant applied to outside of cabin
- Diamond finishing piece on front and rear apex
- FREE DELIVERY (see terms and conditions)

Internal Cabin dimensions (W x L)	5072x 3574mm (18.13 square metres)
External cabin Dimensions (W x L)	5300 x 3800mm (20.14 square metres)
Overhang of Canopy roof from front wall	589mm
Thickness of walls (Finished size)	43mm
Side wall height	Approx 2233mm
Ridge Height	Approx 2793mm

We can adjust the ridge height to overcome planning permission difficulties if requested.

Floor Joists	43 x 120mm
Walls	43 x 114mm
Roofing	20 x 114mm PTGV
Flooring	20 x 114mm PTGV
Door	1258 x 1991mm
Window	1065 x 1132mm
Double Glazing	4mm - 6mm - 4mm

Mayfair 3.8 x 3.8m Garden Room

Along with our 3.8 x 3.2m, this is our most popular sized cabin. Perfect for home office, gym, jacuzzi room, kids room, chill out room, drawing room or just for extra space.

We offer free delivery on this cabin to the areas shown as green on the map.

If you require delivery to an address outside the green area on the map please contact us for a bespoke quotation.

Garden Sheds

Our garden sheds are available in three standard sizes: 1.2m x 1.8m, 1.8m x 2.4m and 2.4m x 3.0m.

We offer free delivery on our sheds to the South West (shown as dark grey) on the map.

If you require delivery to an address outside the South West please contact us for a bespoke quotation.

Features

- FSC certified
- Mono- Pitch Roof
- Onduline Roofing Sheets
- Underlined with OSB
- Treated shiplap cladding
- Breathable membrane
- Timber base
- 44 x 70mm Studwork
- Perspex Window
- Pedestrian Door 0.8m Lined
- Galvanised Fixings including Pad Bolt
- Flat packed/sub assembled kits
- FREE DELIVERY (see terms and conditions)

High Side	2.1m
Low Side	1.8m

Mobile Field Shelter & Stables

Made from FSC certified, high pressure treated Whitewood. Cladded with pressure treated shiplap.

Our mobile field shelters are available in a number of different sizes, with options such as lining, gates and bottom doors. We can also manufacture stables and other agricultural buildings to your individual specification.

If you would like more information on this product, or would like to discuss the options please call us on 01275 549476 or send us an email to info@amidbuildingsolutions.co.uk.

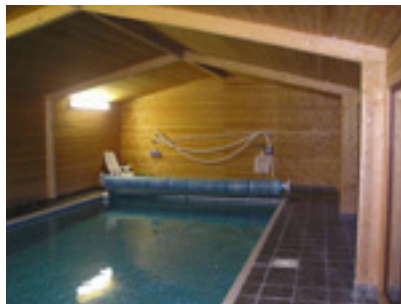

Bespoke Buildings

We have the ability and equipment to produce and install a Bespoke building for you.

We can make anything from a shop kiosk, swimming pool building, log cabin to a log classroom.

Please view the photos below to see the kind of buildings Amid Building Solutions can build for you.

If you have any questions please call on 01275 549476 or email on info@amidbuildingsolutions.co.uk.
